

# VISION

To be a cross sector group delivering improved implementation and understanding of robust and reliable measurement and associated practices

## OBJECTIVES

### Understanding

Dissemination of the role and importance of, and the opportunities within, the world of measurement.

### Technology

Facilitate development and alignment of present and future measurement/data technologies to measurement challenges

### Standards

Promote the development and implementation of standards and specifications.

### Alignment

Align with the Strategic objectives of the Institute and other related working groups.

Provide impartial advice and objective comment on measurement related matters.

## OPERATING STRUCTURE

Led by a steering board, with elected Chair and supported by Working Groups  
With links to and interaction with other InstMC SIGs.
